

# September 2017 News

We have just begun our classes, and there is great excitement in the Center. Challenge, opportunities, affirmation, knowledge all are awaiting us. May we continue to be as enthusiastic as the year goes on, for it is easy to give up when learning becomes more difficult. It is easy to find other tasks and chores to convince us to stay away. **Our theme this year is building bridges.** Remember that discipline is the bridge between goals and accomplishment. (Jim Rohm) Learning is about discovery, about fun, about joy; but learning can also be laborious, difficult and demanding. Discipline can train us to get through the trying times and lead us across the bridge to further learning and a meaningful future.
